

To Whom it May Concern:

I recently received an email regarding FCC new proposed Telephone Privacy laws in adopting one lower national standard. This would still allow unwanted calls into my home. I am very much against this new proposal. With the Indiana Privacy Law has diminish many unwanted calls into my home. I currently work a third shift and with the Indiana Privacy Law has made my sleep pattern much better and the home life for my family much better, because I am more rested. It would be like a first shift person getting woke up at 3:00 a.m. in the morning to have someone wanting to lower your interest rate. Just what you wanted to get woke up to, and then finding it hard to go back to sleep. I used to get up to 5 calls a day and now has pretty much diminished all together. I maybe get one call a week.

Please take my comments in consideration before changing this new standard.

Sincerely,
Deb Hall
